

JiaYou

Digital Architect | Full-Stack Developer

Web: dev.jiayouvibe.com | GitHub: github.com/Jiayoujw

SUMMARY

Full-stack developer crafting interactive experiences at the intersection of code and art. Specialized in building high-performance web applications with cutting-edge technologies. Passionate about creative coding, real-time systems, and immersive 3D experiences on the web.

SKILLS

- Languages: Python, Go, TypeScript, JavaScript (ES6+), HTML5, CSS3
- Frontend: React, Vue.js, Three.js, WebGL, Canvas API, Web Audio API
- Backend: Node.js, Express, Go/Fiber, RESTful APIs, WebSocket
- DevOps: Docker, AWS, Vercel, Git/GitHub, CI/CD
- Specialties: Real-time systems, generative art, creative coding, UI/UX animation

PROJECTS

Neural Net

AI-powered neural network visualization platform with real-time training metrics and 3D model architecture rendering.

Cyber Dash

Real-time data dashboard with WebSocket streaming, particle effects, and holographic UI components.

Chain Vault

Decentralized storage protocol with end-to-end encryption, zero-knowledge proofs, and glassmorphism interface.

Pixel Forge

Generative art studio creating unique digital artworks using procedural algorithms and fluid simulations.

Ghost Protocol

Privacy-first messaging app with quantum-resistant encryption and self-destructing messages.

AI Oracle

Conversational AI interface with voice synthesis, real-time emotion analysis, and holographic 3D avatar.
